CAREER GUIDANCE SYSTEM

PROBLEM STATEMENT:

To make students explore their area of interest and choose the career of their choice and what they love to do which will help them flourish monetarily and help them in a longer run.

OBJECTIVES:

- To enable a login platform for the user
- To let the user take the career guidance test once and to store that result so that the user can view it in the future
- To navigate the flow of subsequent questions based on the answer provided by user to previous questions
- To create a warm ambience that promotes career exploration and decision making
- Empowering young kinds with the apt guidance.

ABOUT THE PROJECT:

A career management system is a tool or platform that helps individuals choose their career. Our project career management system offers guidance on career planning and goal setting. It can be useful for people at all stages of their careers, from those just starting out to those looking to advance or make a career change however it mainly focuses on students coming out of school.

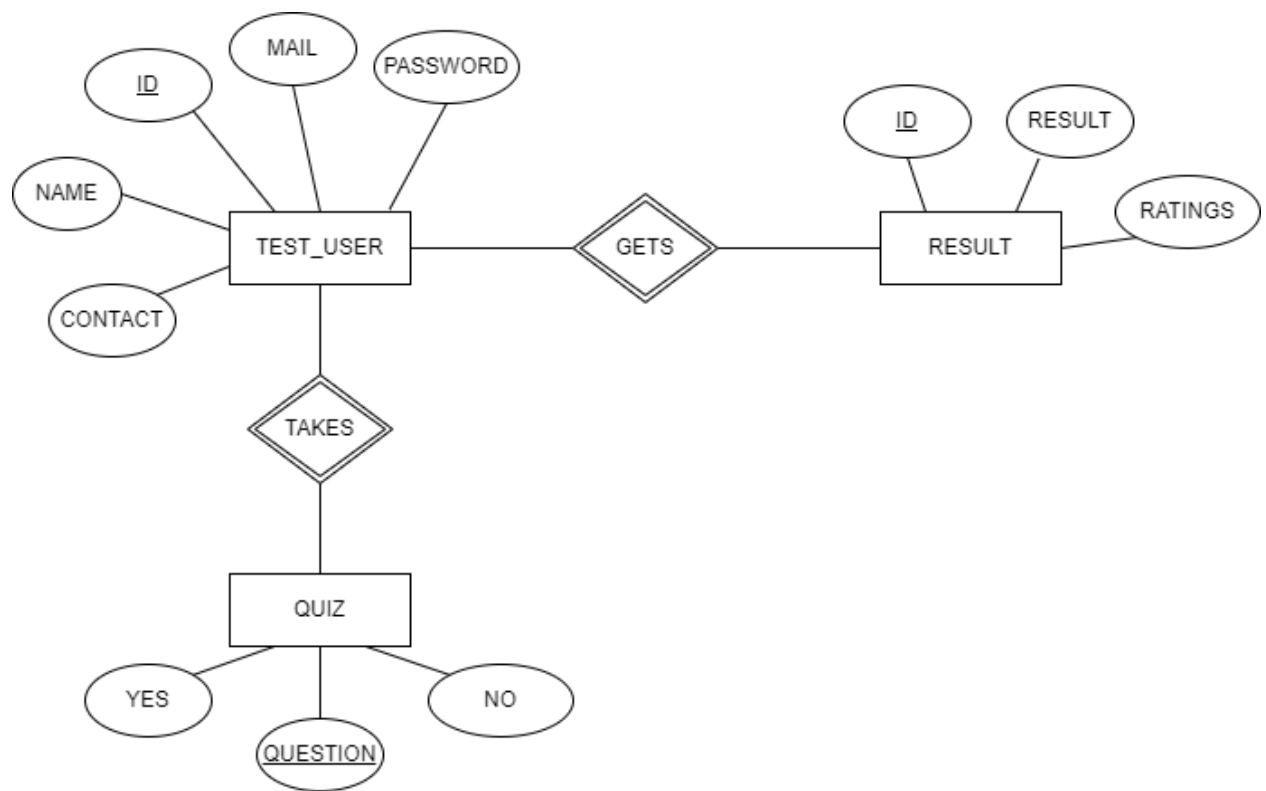

Deciding on a career is an important process because it can have a significant impact on future. A career is not just a job or a source of income, but rather it is a long-term pursuit that will likely occupy a significant portion of your life and play a major role in shaping identity

and sense of purpose. It's important to choose a career that aligns with your values, interests, and skills, and that provides fulfillment and satisfaction.

Choosing a career is also an important decision because it can be difficult to change careers once you have invested time and resources into a particular field. It's important to take the time to research and consider your options before making a decision, and to be open to seeking advice and guidance from others who may have more experience or knowledge in this area.

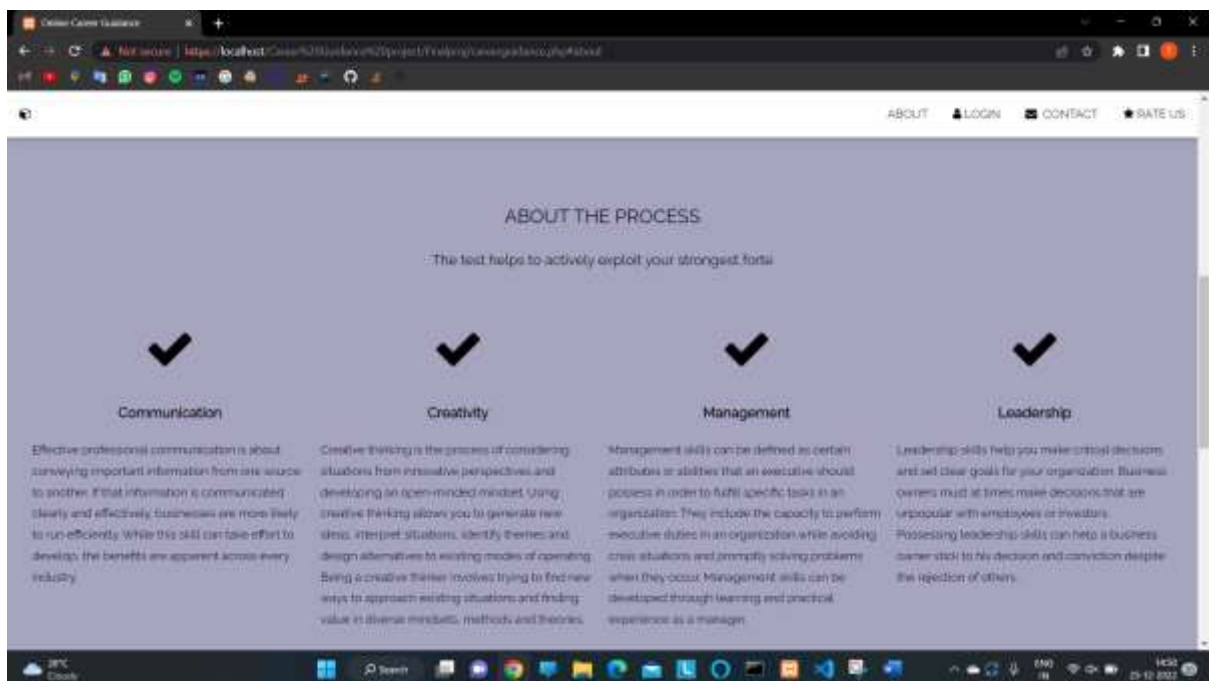

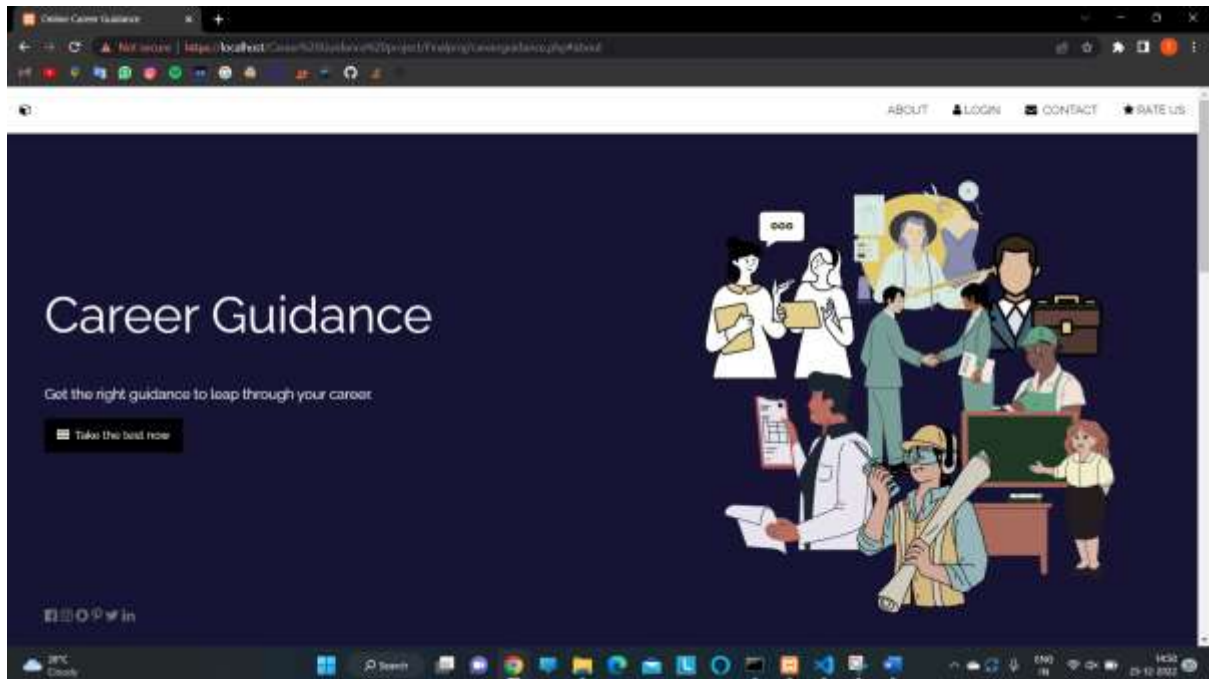

Our system facilitates people to log in and take up a career guidance test so end of the test they will be able to explore their area of interest.

DB WORKING:

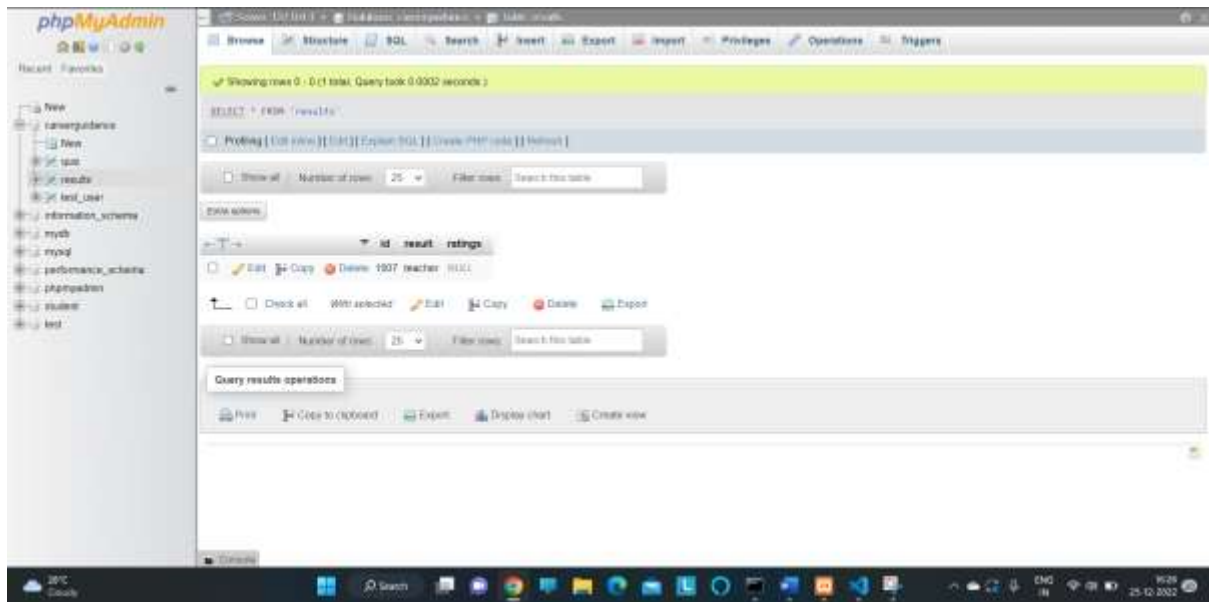

The screenshot shows the phpMyAdmin interface with the 'location' table selected. The table has two columns: 'id' and 'name'. The 'id' column is an auto-incrementing integer, and the 'name' column is a string. The table contains 15 rows of data, each representing a location. The interface includes a sidebar with a database tree, a top navigation bar, and a main content area with a table view and various action buttons.

	id	name
1	1	Location: q3.php
2	2	Location: q4.php
3	3	Location: q5.php
4	4	Location: q6.php
5	5	Location: q7.php
6	6	Location: q8.php
7	7	Location: q9.php
8	8	Location: q10.php
9	9	Location: q11.php
10	10	Location: q12.php
11	11	Location: q13.php
12	12	Location: q14.php
13	13	Location: q15.php
14	14	Location: q16.php
15	15	Location: q17.php

The screenshot shows the phpMyAdmin interface with a query result displayed. The query is 'SELECT * FROM test_user'. The result shows one row of data for the user 'test_user'. The interface includes a sidebar with a database tree, a top navigation bar, and a main content area with a query editor and a results table.

id	name	pw	mail	contact
1907	test_user	alice	testuser03@gmail.com	8472912453

CONCLUSION:

Thus the system we proposed provides perfect career guidance for the freshers by making them know what they love and what is going to excite them in future when they took it up as their career.
